Learning Management System (LMS)

Counselling Process

Mode of Counselling :- Synchronous and Asynchronous

Brief describe the provision in LMS to be used by HEI :-

The LMS platform for students offers a highly customizable, user-friendly interface that both the students and the teaching faculties can adapt and work to fit their specific course requirements. It is designed on a comprehensive note for easy navigation and provides the students with a flexible and responsive learning experience. The learning experience is made available through web portal and Android app, as well as the desktop version. The platform integrates video conferencing and live chat features, enabling faculty led live sessions and interactive student engagement through online. Its hosted on AWS Cloud in India and is capable to benefit from a scalable 1 Gbps Internet connection, ready for future expansion. It supports graphic exercises, audio-video tutorials, assessments, quizzes, digital learning material, academic activities like case studies, discussion forums etc; in various formats enhancing the learning journey through self-paced, guided and of peer learning. The LMS platform supports group activities including assignments & projects by catering to multiple learning communities and with continuous engagement.

Briefly write how the Learning Management System (LMS) will ensure the following: (provide a demo link, if available) :- <https://lms.suonline.ac.in/>

Assessment mechanism

The LMS platform helps the students in multiple ways. Especially with respect to exams, the online submission and grading of assignments, are made possible through assessment platform. Different types of questions can be configured to assess the learner like Audio-video questions, Descriptive type questions MCQ, Matching answers. True or False, Fill in the blanks; Numerical questions, Case study analysis, Essay type and Short answers type. The exams can be conducted through online mode and the application is of AI Powered Remote Proctored Online assessment engine which has been integrated within the LMS platform. The software uses algorithms to create a unique question paper for each student through randomization. Marks and grades can be set for the questions and sections as per the blueprint of the question paper. The LMS platform has its own communication engine also. The student registration and exam scheduling can be done through the LMS as well. Grades and marks for continuous assessments can be automatically generated by the system. Learner authentication is done in two steps. The AI engine does a face matching for the student. Additionally manual proctor further authenticates the student examinee for the assessments.

Identified technological interface and interoperability	The learners have the convenience of accessing the content through multi mode The Web Portal and Mobile App (android and ios) are the interface for learners to use and access the content. The application provides the user state of art features of technological interface and interoperability.
Learner's Authentication Requirements	The learner gets the unique login credentials based on their personal email id and linked contact number and shall use the LMS through the protected login only. A non- learner cannot access the LMS at any given point of time as the system does not permit them to login without proper credentials. The solution runs on HTTPS servers and is behind firewalls. The IP address of each learner is tracked and logged. The entire footprint of the learner is tracked and stored for reference
Learner Registration - through a web application	The LMS provides a structured user registration process and allows for detailed user profiling. Each user is assigned a personalized dashboard, which displays relevant information and resources based on their profile and learning needs. This personalization enhances the user experience and facilitates more effective learning through easy navigation
Active Engagement of the Learners along with Analytics for active engagement of learners and Reporting	Active Engagement of the learner is done through the following features and facilitation on the learning platform. Interactive videos Faculty led live sessions, Gamification exercises, Collaborative group projects, Discussion forums, etc .Facility to track learner progress using the dashboards Further, Peer-group interactions are available in the platform. The LMS platform is linked to social media like Linked-in and FB wherein the students can add their social media profiles and share their achievements. The faculty members can divide the classes into smaller cohorts and conduct breakout room sessions with them individually. The different stakeholders can be facilitated with customized dashboards as Student dashboard; Faculty Dashboard; University leadership dashboard
Payment Gateway –using Digital Payment system	The LMS ensures that financial transactions are handled effectively through online by integrating a secure and efficient payment gateway, This helps to the convenience of the users and administrators in ensuring a smooth and secure transaction success through the Digital payment system. It payment options to the learner through enabling Payment gateways for digital payments towards the online fee payments. This provisioning is to benefit the students with respect to new admissions and the continuation fee payments. The students will have the option to choose the mode of payment by enabling the multiple payment gateway.
Tracking the delivery of a Course or programme	Program/Course Delivery tracking can be effectively done through the academic Calendar and the flow of events. It is ensured through the LMS that the academic modules like ELM, A/V Lectures, and Faculty led Live Sessions are well executed on a holistic programme management. Regular assessments will also be enabled as per the exam schedule and eligibility criteria for the batch . With the academic calendar in place, the programme delivery can be well executed and tracked with progress/status. Learners progression tracking is also possible wherein the Learners can go to LMS and click on Activity completion to track his/her progress. The faculties can monitor the progression of learners with respect to the subject and the programme. Reports are generated on the learner attendance, activity completion, Quiz performance and the success rate in term end exams with respect to pass/fail in an automated system
Technical Know-how or Skills Requirements	The LMS is very much user friendly and the learners can navigate easily through the student portal with basic internet connections. Demo Videos as student guide will be created and shared with all the learners while sending learners credentials by mail. The university will also conduct orientation before the start of the session and run periodical " Know your LMS " training sessions to the students to bring them to complete ease towards learning and assessments. The learner will be completely handheld by the university team and be available to handle all queries and suggestions
